Use case of the datation field

A team of researchers is conducting an inventory of objects found in a castle. Some objects are difficult to date precisely. However, various temporal clues can be associated with the objects to estimate their approximate creation date. A complex Datation field is created with the options for manual entry and using a choice set.

Configuration of the datation field

The choice set of datation type is created prior to the datation field. It is configured as follows:

The datation field is created and configured as follows:

Data entry options

Single value – optional

Please select the input format(s) to be used

By date/time

Please select the format

Allow dates before Jesus Christ

By choice set

Please select the choice set(s)

Both formats are admitted during data entry

Date formats should preferably be the same in both data entry format

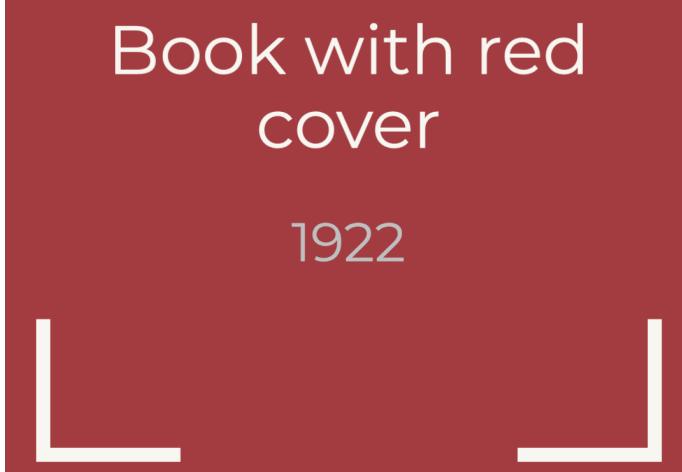

The datation type choice set has been created prior to the datation field

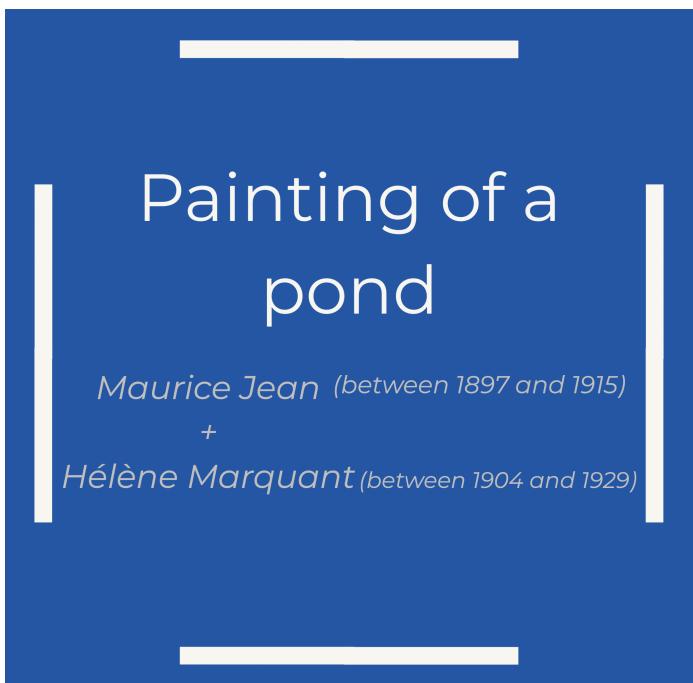

When editors enter the data, they have the following possibilities:

- Enter a **manual** datation with a start date and/or an end date.
- Enter a datation **using a choice set**. This is a list of periods configured by the administrators and super-editors of the Catima catalog.
- Not enter any datation.

Catalog Data

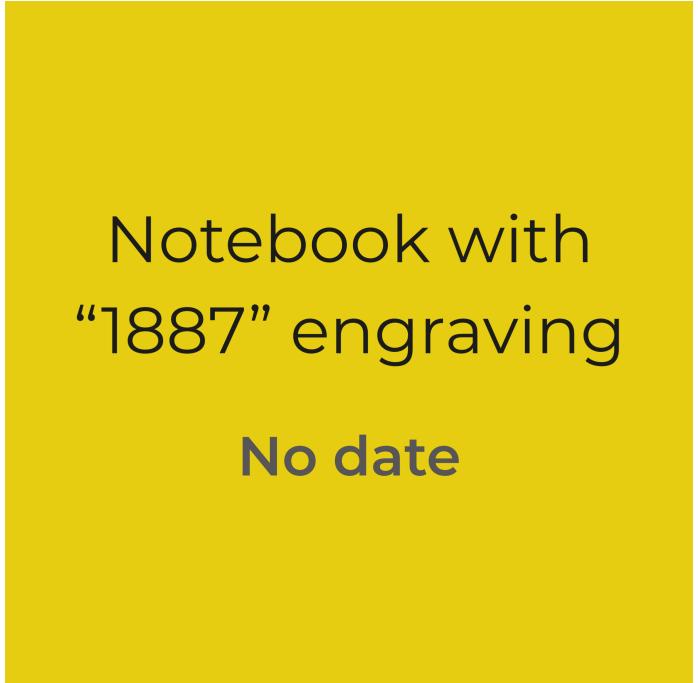

This catalog consists of 13 objects, which are as follows:

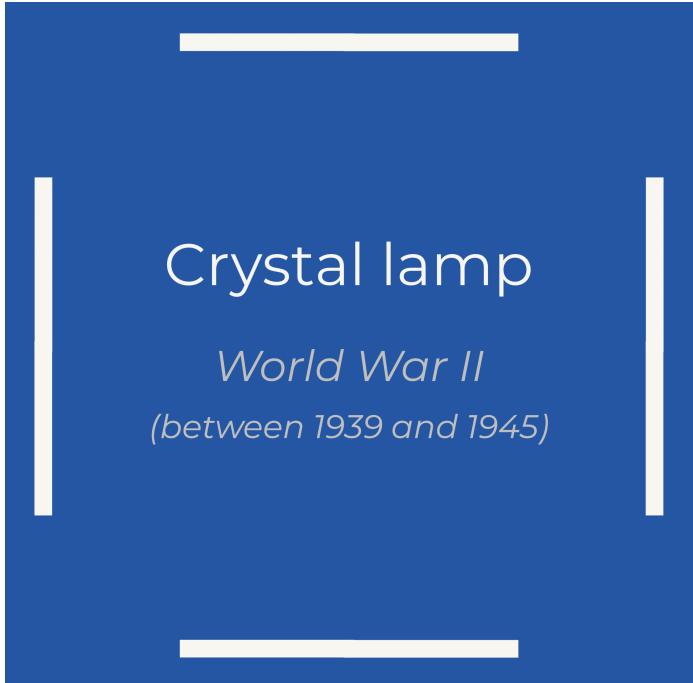

Object Title	datation information	Chosen datation	Thumbnail
A Book	The printing date "1922" is found on the first page.	Manual between 1922 and 1922	 <p>Book with red cover</p> <p>1922</p>
A Tablecloth	It is estimated to be from the early 19th century.	Manual between 1815 and 1850	 <p>Embroided table cloth</p> <p>between 1815 and 1850</p>

Object Title	datation Information	Chosen datation	Thumbnail
A Tea Set	The factory name is indicated on the cups. It has been in operation since 1902.	Using choice set Benson Factory: before 1902	
A Painting	It doesn't have a signature. Two searchers disagree: one claims it's from a painter, the other from one of his students.	Using choice set with two choices Maurice Jean: between 1897 and 1913 + Hélène Marquant: between 1904 and 1929	

Object Title	datation Information	Chosen datation	Thumbnail
A Table	<p>Based on the construction style, it's estimated to date before the Industrial Revolution.</p>	<p>Manual Before 1750</p>	
A Carpet	<p>The name of a manufacturer that ceased its activity in 1782 is found on it. The start date of its activity is unknown.</p>	<p>Using choice set Ruell Industry: before 1782</p>	

Object Title	datation Information	Chosen datation	Thumbnail
A Vase	<p>It has floral patterns typical of the 17th century, but its state of preservation suggests it could be a 20th-century copy.</p>	<p>Using choice set with two choices 17th century: between 1601 and 1700 + 20th century: between 1901 and 2000</p>	<p>Vase with floral patterns</p> <p>17th (<i>between 1601 and 1700</i>) + 20th (<i>between 1901 and 2000</i>)</p>
A Plate	<p>It doesn't have any indications that could help with datation.</p>	<p>None</p>	<p>Ceramic dinner plate</p> <p>No date</p>

Object Title	datation Information	Chosen datation	Thumbnail
An Empty Notebook	The year "1887" is engraved on the back of the notebook, but it's unclear when this was done.	None	
A Kinetoscope	It's a Edison brand Kinetoscope, it was created after 1895.	Manual after 1895	

Object Title	datation Information	Chosen datation	Thumbnail
A card game	<p>It's known to have been manufactured by Raymond Printing house, which operated from 1864 to 1913.</p>	<p>Using choice set Raymond Printing house between 1864 and 1913</p>	
A Lamp	<p>It's estimated to date from World War II.</p>	<p>Using choice set World War II: between 1939 and 1945</p>	

Object Title	datation Information	Chosen datation	Thumbnail
A Letter	It's undated, but based on its content, it's believed to be from the year 1940.	Using choice set Child of <i>World War II</i> : Year 1940: between 1940 and 1940	A blue rectangular background with white vertical borders on the left and right sides. In the center, the text "Soldier's letter" is written in a large, white, sans-serif font. Below it, "Year 1940" is written in a slightly smaller white font, followed by "(1940)" in parentheses.

Examples of Searches

To facilitate this example, photos of the objects have been replaced with colored and coded thumbnails according to the assigned datation type:

- Yellow with no border: **no datation**
- Red with corner borders: **manual datation**
- Blue with borders without corners: **choice set datation**

Simple Search

A simple search in the search bar does not allow searching for periods as it only searches within the text.

We search for all objects dated between 1939 and 1945

between 1939 and 1945

Search

[Advanced](#)

Nothing found for “between 1939 and 1945”

Save search

A simple search does not calculate periods.

The vase appears because it has two choices, 17th century and 20th century. The 17th century choice includes dates before 1800.

Booleans: AND, OR, EXCLUDE

Booleans allow searches to be broadened or refined in more or less complex ways. In the datation field, multiple search criteria can be combined. This set of criteria can then be combined with criteria from other fields using the first operator in the field.

The screenshot shows a search interface with a 'Datation' section. It features a dropdown menu with 'and', 'or', and another 'and' option. A red arrow points from the text 'The first boolean always refers to the other fields' to the top 'and' button. Another red arrow points from the text 'The other booleans refer to the other datation criteria' to the middle 'or' button. To the right of the dropdown are two date input fields: '1940' and '1960', each with a calendar icon, a delete button, and a plus sign. Below these are 'before', 'after', and 'Choose...' buttons. At the bottom left is an 'Exclude' button, and at the bottom right is a '+' button.

We search for objects dated after 1930 AND before 1970

Difference with Manual Search We want to do the same search manually: We search for all objects dated before 1782.

The screenshot shows a search interface with the following fields:

- Datation:** A dropdown menu set to "and". Below it are two more dropdown menus, both also set to "and".
- Date Range:** A date range from "1782" to "Choose...".
- Time Period:** A dropdown menu set to "before".
- Exclude:** An empty dropdown menu.

Results

3 advanced search results [Save search](#)

Why does the manual search show one more entry than the choice set search? A choice set search returns entries that carry the selected choice and manually dated entries that have at least one date falling within the period. It does not include other choice-dated entries that fall within the period. Manual searches apply to all entries.

Precision on choices with specific dates When conducting a search with a choice bearing a specific date (e.g., "Year 1940"), the search will only return entries that carry that choice and manually dated entries with the exact same date. The search will not include manually dated entries with multiple dates even if they include the searched-for date.

Exclude Option

We only search for entries that are dated using a specific choice

The exclude option allows the exclusion of one or the other of the input formats in the search.

Example

We search for entries dated between 1900 and 1939.

The screenshot shows a search interface with the following fields:

- Datation:** A dropdown menu set to "and". Below it are three more dropdown menus, all set to "and".
- Date Range:** A date range from "1900" to "1939".
- Time Period:** Two dropdown menus set to "after" and "before".
- Exclude:** An empty dropdown menu.
